6. RATIONALE FOR THE INCLUSION OF CONTENT AND TEACHING APPROACH

School-based work is a critical component of effective TESOL/ESL/EFL teacher education, not only providing an essential forum for generating concrete problems and issues and applying new knowledge and skills, but also enabling the development of an integral link between theory and practice. This course provides TESOL/ESL/EFL teachers with the opportunity to gain additional classroom practice in this specialist field at proficiency level.

7. TEACHING STRATEGIES

Students learn best when they are engaged and given an appropriate level of challenge; when their prior experience and knowledge is valued and built upon; when they are expected to take responsibility for their own learning; and when they work collaboratively with their peers.

Thus, teaching strategies used during the course will include:

Weekly, face-to-face contact sessions.

Small group cooperative learning to demonstrate the use of group structures to address teaching and learning goals;

Structured occasions for students to reflect critically on and improve teaching practice;

Plenary discussions around core methodological issues and debates

Extensive opportunities for whole group and small group dialogue and discussion, allowing students the opportunity to demonstrate their capacity to communicate and liaise with the diverse members of an education community, and to demonstrate their knowledge and understanding of method content.

Online learning from readings and other useful web links.

These activities will occur in a classroom climate that is supportive and inclusive of all learners.
