		office: CE211	
		phone: 02 9385 7773	

## INFORMATION ABOUT THE COURSE

This course is available to all Civil Engineering students who are completing their final year of study in their

## HANDBOOK DESCRIPTION

This course is the second of two parts and is undertaken after the completion of CVEN4050 Thesis A, usually in the proceeding term. The Thesis involves formulating the designs for and solution to open-ended civil and/or environmental engineering problems. The problems will be drawn from industry and will be multi-disciplinary involving application of material learnt throughout the undergraduate program and will require creative thought. The course will include the preparation of relevant professional documents.

It is a course requirement that every student is available each week to discuss Thesis B progress with their Demonstrator. You will receive from your Demonstrator, feedback and advice in the preparation of Thesis B. Take heed of the advice as your Demonstrator is one of the markers of your Thesis B submission.

Demonstrators have a requirement to keep record of their Workshop attendances each week.
