# 1. Staff contact details

## Contact details and consultation times for course convenor

Name: Dr Jose Guivant  
Office location: Building J17, Room 510D  
Tel: (02) 9385 5693  
Email: [j.guivant@unsw.edu.au](mailto:j.guivant@unsw.edu.au)

Consultations will take place in L212/J18. The consultation timeslots will be announced later. Consultations are possible outside the set times, but a prior appointment is preferred. Email, telephone and Moodle discussions can also be used for solving more general issues.

## Contact details and consultation times for additional lecturers/demonstrators/lab staff

Name: Dr Ngai Ming Kwok  
Office location: Building J17, Room 510C  
Tel: (02) 9385 6091  
Email: [nmkwok@unsw.edu.au](mailto:nmkwok@unsw.edu.au)

Consultation by email appointment.

Please see the course [Moodle](#).

# 3. Fundamentals

## Credit points

This is a 6 unit-of-credit (UoC) course and involves 4.5 hours per week (h/w) of face-to-face contact.

The normal workload expectations of a student are approximately 25 hours per term for each

## Student learning outcomes

This course is designed to address the learning outcomes below and the corresponding Engineers Australia Stage 1 Competency Standards for Professional Engineers as shown. The full list of Stage 1 Competency Standards may be found in Appendix A.

After successfully completing this course, you should be able to:

Learning Outcome		EA Stage 1 Competencies
1.	Understand the general theory of Bayesian Estimation. Understand the theory and application of the Kalman Filter (KF and EKF) for solving diverse types of problems in the area of Engineering	PE1.1
2.	Understand methods such as Neural Networks, Fuzzy Logic and PSO.	PE1.1
3.	Be able to develop software for applying the theory, and actually solving complex problems. Have experience in using state-of-the-art sensors, used in Field Robotics and Autonomous Systems.	PE2.3

## 4. Teaching strategies

Teaching of this course is implemented through lectures to cover the theory, and project sessions to put those concepts in practice. All laboratory/project work is individual work, and attendance is necessary.

The provision of the learning environment in the laboratory is to facilitate students developing confidence in managing laboratory tasks as projects. Demonstrators in the laboratories are there to provide guidance and assistance in managing the laboratory tasks.

Examples (e.g.91 T

# 6. Assessment

## Assessment overview

Assessment task	Group Project?	If
