

UNSW SCHOOL OF OPTOMETRY AND VISION SCIENCE
PRESCRIBED-RECOMMENDED-REFERENCE TEXT BOOKS 2024

* This list is intended only as a supplement to Course Outlines. The list may be updated as texts with better relevance become available.

* Please note that many monographs have been set as prescribed texts for one course but are then recommended for use in a later course or suggested as a Reference Book for use in Clinic. Therefore, purchasing your own copy of these texts should be regarded as essential.

* Which edition to purchase is essentially irrelevant, you buy the most recent available

* Some texts may be out of print. Secondhand copies are frequently available online and should be pursued. The Library has copies of all texts. [Please notify the lecturer if borrowing congestion occurs](#) because short-term-only borrowing can be instigated.
