

# Course Outline

PSYC5009

Graduate Diploma of Psychology

Abnormal Psychology

School of Psychology

Faculty of Science

2022

3. Develop critical thinking skills enabling you to understand current theories as to the etiology and underlying mechanisms of psychological disorders, as well as somatic and psychological approaches to the treatment of these psychological disorders.
4. Develop an advanced understanding of values in psychology with regards to abnormal psychology, including the ability to consider how prejudice, attitudes and discriminatory behaviours might exist in oneself and in others.
5. Develop effective communication skills in abnormal psychology using various formats and different contexts enabling you to clearly describe and discuss the outcomes of experimental research and data analysis in abnormal psychology.
6. Develop an understanding and apply psychological principles introduced through the abnormal psychology content to personal, social and organisational issues, enabling you to describe major areas of applied psychology (such as clinical counselling).

2.4

in future content. The formative revision quizzes will be available through the MindTap section available on the Moodle
